Professional Summary

Frontend engineer with 5+ years delivering high-performance, scalable web applications using **React**, **TypeScript**, and modern **CI/CD** pipelines. Passionate about creating intuitive, accessible UIs, driving performance optimizations, and collaborating across cross-functional teams. Experienced in contributing to full-stack features with **Node.js**, **Firebase**, and **cloud platforms**, and taking ownership of end-to-end feature delivery.

Key strengths: Component-driven architecture, API integration, performance tuning, Agile/Scrum environments, **state management**, **cross-browser compatibility**, **responsive design**, **Automated Deployment Process**, **cloud platforms**, **continuous learning** of emerging web technologies.

Core Skills

Frontend

- React.js, React Native, TypeScript, JavaScript, HTML5, CSS3, Astro.js, Svelte
- Material-UI, Tailwind, i18next, TanStack Query, Redux, Axios

Backend & DevOps

- Node.js, Python, REST APIs, Firebase, MongoDB, SQL, Strapi, AWS, Azure
- Docker, Kubernetes, GitHub Actions, PM2, Azure DevOps

Tools & Testing

- Cypress, API Clients/Postman/Yaak, Swagger, JIRA, Git, Bash, CI/CD pipelines, Powershell
-

Professional Experience

Frontend Developer

Efbet | July 2025 – Present | Sofia, Bulgaria

- Developed and maintained the **bet.bg** platform used by hundreds of thousands of users, implementing responsive UI components and core betting features using modern frontend technologies
 - Contributed to frontend development for the **Efbet platform migration**, ensuring a seamless user experience and stable transition for **millions of existing users**
 - Built and optimized cross-platform **mobile app features** following mobile-first and responsive design principles
 - Contributed to the internal **backoffice system**, developing admin dashboards and management tools used by operations teams
-

Front-End Engineer

eLando AD | Dec 2024 – July 2025 | Sofia, Bulgaria | Team of 5

- Built a new marketing website using **Astro.js + TypeScript**, boosting page speed by 35%
 - Integrated **Strapi 5 CMS**, localization (i18next), and secure API authentication
 - Automated deployment via **GitHub Pages**, **PM2**, and Bash scripts
-

Euroins Insurance Group

Rebuilt the whole applications from scratch to improve support and performance.

Self-Service Portal (Dec 2023 – Mar 2024) | Team of 7

- Created UI components for policy management and claims using **React + Material-UI**
- Integrated REST APIs via **Axios** and **React Query**, added secure login & JWT handling and caching
- Enhanced UX responsiveness across mobile & desktop

Admin Portal (Apr 2024 – Aug 2024) | Team of 8

- Designed role-based dashboards with **Material-UI**, optimizing data rendering by 10×
- Deployed in **Docker/Kubernetes** with CI/CD through **Azure DevOps**

Health Portal (Sep 2024 – Nov 2024) | Team of 9

- Developed WCAG-compliant UIs; improved accessibility using semantic HTML and ARIA
 - Coordinated with backend using **Swagger** contracts, wrote tests in **Cypress**
 - Integrated REST APIs via **Axios** and **React Query**, added secure login & JWT handling and caching
-

Frontend Developer

Fidweb Inc. | Mar 2019 – Feb 2022

Hydropro (Mar 2022 – Jun 2022) | Team of 6

- React-based website with product calculators and backend integration

UniBank (Sep 2021 – Feb 2022) | Team of 8

- Financial services site in **React + Node.js**; backend data connections

Amarant App (Jan 2021 – Aug 2021) | Team of 10

- Insurance application for iOS and Android platforms; implemented designs, built functional components

Technologies: React Native, Sass, Redux, Xcode

Selected Freelance Projects

- **uCalc (Non-profit)** | Dec 2022 – Mar 2023

React app for student budget tracking; implemented auth, design, database (Firebase)

- **NaOpaki** | Jul 2022 – Nov 2022

Eco startup website on **Squarespace**; custom forms, client onboarding

- **Mica Maritime** | Apr 2023 – Jul 2023

Built a job-matching portal using **React, Redux, Firebase**

Designed UI/UX from scratch; implemented Google Workspace integration

Developed real-time forms and NoSQL database structure

- **Real-Time Basketball Statistics Integration** | Sep 2022 – Sep 2023

Used **Python** and serial port data to pull and analyze real-time stats from **professional** basketball scoreboard devices during live games

Wrote custom scripts to make sure the game data was accurate and updated in real-time for **live TV broadcasting**

- **Zalagai.bg – AI Betting Predictions Platform** | Jul 2025 – Present

Building an **AI-powered sports betting prediction platform** that analyzes match data and betting odds to generate outcome probabilities

Built a **Python backend** for data processing, prediction models, and REST API endpoints serving predictions

Implemented the frontend using **React with TanStack Start**, creating a fast and responsive interface for viewing predictions and match analytics

Game QA (Contract)

Football Manager 2023 (SEGA) | Sep 2022 – Sep 2023

- Performed testing using Nintendo's specialized software to ensure quality and functionality.
- Conducted cross-platform QA testing; managed bug reports in **JIRA**
- Collaborated closely with devs, wrote test cases in **TestRail**

Education

B.Sc. Applied Mathematics & Informatics

Faculty of Mathematics and Informatics, Sofia University "St. Kliment Ohridski" – Sofia, Bulgaria

High School – Physics and Mathematics

National High School of Math and Science – Sofia, Bulgaria

Certifications & Awards

- Winner of logo design contest (Adobe Illustrator & Photoshop)
 - Advanced JavaScript Concepts (Udemy)
 - Modern React and State management (Udemy)
 - Won National Science and Engineering Fair (Physics Category)
-

Languages

- **English:** Fluent
 - **Bulgarian:** Native
 - **German:** Beginner
