

Victor Tsenov

Senior Web Developer | React, TypeScript & React Native

Paris • +359 878 27 37 37 • victor@tsenov.com • [LinkedIn](#) • [GitHub](#) • [Portfolio](#)

Profile

Product-minded frontend engineer with 6+ years of experience building and modernizing web and mobile applications. Specialized in React, TypeScript, React Native, frontend architecture, state management, API integration, performance, and accessible UI development. Experienced in owning complex features from planning through release, rebuilding difficult legacy frontends, mentoring teammates, and collaborating across product, design, backend, QA, and operations.

Signature Strengths

- Modernizing and scaling complex React applications
- End-to-end ownership of complex product features
- Building maintainable frontend architecture
- Mentoring, code review, accessibility, and product-focused delivery

Technical Skills

Frontend: React, React Native, TypeScript, JavaScript, HTML5, CSS3, Astro, Svelte, Material UI, Tailwind CSS, TanStack Query, Redux, i18next

Backend & Cloud: Node.js, Python, REST APIs, Firebase, MongoDB, SQL, Strapi, AWS, Azure, Docker, Kubernetes

Quality & Delivery: Cypress, Git, GitHub Actions, Azure DevOps, Swagger/OpenAPI, Jira, TestRail, Bash, PowerShell, CI/CD, code review

Professional Experience

Frontend Developer — Efbet

Jul 2025 – Sep 2026 | Sofia, Bulgaria

- Own frontend delivery across customer-facing betting and casino products, React Native mobile experiences, and a large, feature-rich internal back-office platform.
- Build complex back-office workflows supporting content management, payments, casino configuration, and daily platform operations.
- Develop reusable responsive navigation architecture across betting and casino products, including shared headers, menus, categories, and game-discovery structures.
- Implement customer-facing payment journeys and contribute to the Efbet platform migration while protecting consistent behavior across interconnected product areas.
- Review code and support teammates with React patterns, implementation decisions, and problem-solving.

Web Developer — eLando AD

Nov 2023 – Jul 2025 | Bulgaria

- Owned complex frontend features from requirements and API coordination through implementation, testing, and release; mentored teammates and reviewed code across projects.

Euroins Insurance Portal Suite

Dec 2023 – Nov 2024

- Led a ground-up frontend refactor across the Self-Service, Admin, and Health portals, replacing fragile legacy patterns with a cleaner React architecture.
- Modernized server-state management with TanStack Query, introducing structured caching, more reliable API synchronization, and reusable patterns across the portal suite.
- Improved authentication and authorization flows and owned frontend delivery for policy management, claims, reporting, health services, and role-based administration.
- Improved responsive behavior, semantic structure, accessibility, and interface consistency; coordinated Swagger contracts, added Cypress coverage, and supported Azure DevOps delivery.

eLando Marketing Website

2024 – 2025

- Built a performance-focused Astro and TypeScript website with Strapi 5, i18next, authenticated APIs, and reusable components.
- Automated deployment with GitHub Pages, PM2, and Bash scripts, creating a repeatable release process and reducing manual deployment work.

Quality Assurance Engineer — SEGA Europe

Football Manager 2023 | Jul 2022 – Sep 2023 | Hybrid

- Performed cross-platform QA with Nintendo testing tools, documented reproducible defects in Jira, maintained TestRail cases, and collaborated with developers to verify fixes across releases.

Freelance Web Developer

Commercial and non-profit projects | Feb 2021 – Sep 2023

Real-Time Basketball Statistics

- Built Python scripts that processed and validated serial-port data from professional scoreboard hardware during live television broadcasts.

Mica Maritime

- Designed and built a React, Redux, and Firebase job-matching portal with authentication, Google Workspace integration, real-time forms, and a NoSQL data model.

uCalc and NaOpaki

- Delivered a non-profit student-budget application and an environmental startup website with custom forms and onboarding functionality.

Web Developer — FidWeb

May 2019 – Feb 2021

Amarant

- Built reusable React Native components and application flows for an insurance product targeting iOS and Android.

UniBank and Hydropro

- Developed React and Node.js financial-services functionality, backend integrations, and interactive product calculators.

Education

Mathematics and Computer Science Studies

Sofia University "St. Kliment Ohridski" | 2018 – 2022

Certifications & Awards

- Advanced JavaScript Concepts — Udemy
- Modern React and State Management — Udemy
- Winner, National Science and Engineering Fair — Physics Category
- Winner, Logo Design Contest — Adobe Illustrator and Photoshop

Languages

Bulgarian: Native • English: Fluent • French: Learning • German: Beginner

Interests

Microcontrollers, audio technology, artificial intelligence, electronic engineering, vintage technology, alternative music, football, visual arts, and books.
